

Replacement Batteries for 918S Tank Alarm Box (Post-August 2017)

May 28, 2019

Due to part obsolescence and UL restrictions on retrofits, Morrison Bros. Co. will no longer be able to provide replacement batteries for “old style” 918S Tank Alarm Boxes. If an old style battery kit was purchased after August of 2017, they will qualify for a credit. Customers in need of a battery replacement for an “old style” alarm box will need to purchase a new tank alarm box (918S--1100 AA).

Although the discontinuation of the old style battery is beyond our control, Morrison Bros. realizes this change has the potential to be inconvenient for some of our customers. As a result, we have decided to issue a credit—*for a limited time*—to distributors who are in need of a replacement battery but who are now required to purchase a new tank alarm box.

CREDIT REQUIREMENTS

Morrison Bros. is offering a \$90 credit for authorized Morrison distributors who need to purchase a new 918S tank alarm box (due to the obsolescence of the old style battery). In order to receive this credit, your circuit board must be V1.30 dated 07-17-17 (refer to Circuit Board image.) Please contact Morrison’s Customer Service Department to secure a Return Merchandise Authorization (RMA).

**This credit program will be in effect until June 1, 2020.*

Please note: Alarm boxes containing the old style battery that are still working do NOT need to be replaced.

If you have any questions, please feel free to contact Morrison Bros. Co. customer service at (800) 553-4840 or custserv@morbros.com.

Old Style Battery

New Style Battery

Gray box represents “old style” battery location.

Battery must be removed to view date code.
